## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-58, 61 & 63 are allowed [ renumbered as 1-60 ].
2. The following is a statement of reasons for the indication of allowable subject matter:

There is no prior art that shows the claimed program for monitoring depletion of a consumable resource in a monitored printer system. Information is received on at least one unit of work to be processed by the monitored printer system, the printer monitored system would deplete the consumable resource when processing each unit of work. A determination is made of a rate of resource deplete per unit of work processed. An amount of resource remaining after the printer monitored system processes the at least one unit of work is estimated as a function of the determined rate of resource deplete and a number of one or more units of work to process, wherein estimating the amount of resource remaining comprises multiplying a number of one or more units of work to process times the rate of resource depletion to estimate an amount of resource depletion that results from processing the at least unit of work and setting the estimated amount of resource remaining to the estimated amount of resource remaining minus the estimated amount of resource depletion and generating a graphical element for display on a computer monitor indicating the estimated amount of the resource remaining.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Overall et al. (U.S. 5,797,061) Method and apparatus for measuring and displaying a toner tally for a printer.
- Kanaya et al. (U.S. 6,223,131) Ink cartridge for an inkjet recording apparatus and a system for detecting and displaying an ink consumption state of an ink cartridge.
